

Can you
manufacture
such a
product?

If you have a problem about **MATERIAL** and **PRECISION PROCESSING**,

Please leave it to **FUTA-Q**

I'm stuck...

It takes time to
procure part because it's
imported machine...
What should I do?

I got it!

At this kind of time...

This is what
I mentioned...

All right!

Leave it to us!

We measure
the dimension of the part
and make a sketch.

We create a production drawing by CAD
for the part, and propose some plans,
such as the way to improve durability,
to the customer.

Then, we finally
complete the final
production drawing
taking into account
manufacturing
process.

We input CAD data to machine
and manufacture the part.

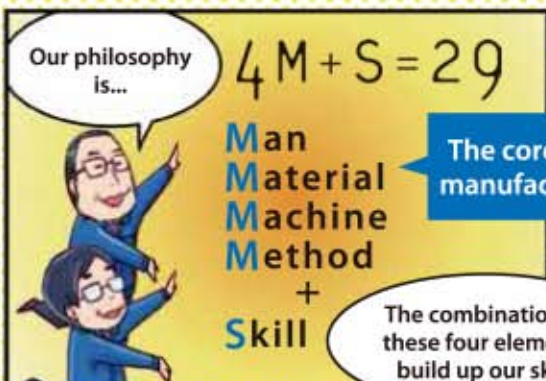

Our philosophy
is...

4M+S=29

Man
Material
Machine
Method
+
Skill

The core of
manufacture

The combination of
these four elements
build up our skill.

We made it!

Thank you!
I am glad that I requested
that of you.

We provide
you total
support until
completion!
